

10 x Tile Trim Heavy Duty L Shaped Edge Aluminium 10mm

RRP: \$164.95

Tile Trim serves a multifaceted purpose in tiling projects, concealing and safeguarding tile edges, enclosing plumbing, surrounding windowsills, and imparting a polished and professional finish.

Crafted from Premium Quality 10mm polished Aluminium, these 2.44-meter trims exhibit a lustrous quality, made with performance-grade aluminum that is low in iron, offering brightness and a glossy finish.

Anodized for high corrosion resistance and an optimum seal, these trims ensure durability against wear and tear, eliminating concerns of milking or flaking.

Renowned for their strength, toughness, and durability, these trims extend their utility beyond conventional applications, doubling as listello or capping trim. They find additional roles such as worktop front edge, worktop upstand, doorway threshold, or matwell trim, all while seamlessly coordinating with modern fixtures and fittings.
