

5800W Watt 4 Channel Car Truck Amplifier Stereo Audio Speaker Amp System Device

RRP: \$199.95

Constructed from aluminum, this amplifier combines sleek design with robust functionality.

With dimensions measuring 32 x 24 x 4.5cm, it offers a peak output power of 1000W, providing 100W per channel for an immersive audio experience. The use of high-power non-sense resistance ensures excellent stability and supports high-temperature working conditions. In the event of a circuit short, the fuse automatically disconnects, activating protective measures.

The amplifier is finely crafted with solid components and a well-coordinated motherboard, minimizing the risk of failures. Boasting energetic and strong power, it effortlessly drives subwoofers. Its nondestructive amplifier installation ensures a 360° round sound, delivering an impressive audio performance.
