

4-Way Water Distributor Garden Irrigation

Out of Stock: \$69.95

Constructed from high-quality TPR+ABS (thermoplastic rubber and acrylonitrile butadiene styrene) material with an aluminium alloy nut, our four-way water distributor is built tough for Australian conditions, ensuring durability and a lengthy service life. Engineered to prevent leaks and maintain high water pressure when sealed, it's a reliable choice for your outdoor watering needs.

Compatible with all 3/4" and 1/2" garden hoses, taps, and garden irrigation timers, this hose splitter is versatile and adaptable to various setups.

Featuring four double shut-off valves, our 4-way water distributor allows for individual water flow adjustment with ease. Simply turn the knob to control water flow, ensuring precise distribution. Withstanding water currents of up to 125 PSI, rest assured there will be no leaks or drops to worry about.

Transforming one tap into four separate water sources for different needs has never been simpler with our tap splitter. Easy to install and operate, it's the perfect solution for efficient garden irrigation.

From garden and lawn irrigation to house and pet cleaning, our garden hose distributor is your trusty companion for a range of tasks. It's a versatile and indispensable tool for both work and everyday life.
