

## Cuttable Threshold Ramp Rubber Wheelchair Ramp Solid 4 cm Rise 90 cm Wide

Out of Stock: \$74.95

The Randy & Travis solid ramp boasts an impressive loading capacity of 15,000kg, providing a smooth and stable transition for various purposes. With a remarkable bearing capacity, it's ideal for long-term transportation or facilitating the movement of wheelchairs, sweeping robots, pushcarts, baby carriages, and more. Its resistance to compression ensures durability and prevents deformation over time.

Crafted from premium natural rubber material, this ramp offers exceptional heat resistance, wear resistance, and deformation resistance. It's devoid of any irritating smells, emitting only a slight rubber odor, ensuring a comfortable user experience.

Featuring a non-slip surface adorned with anti-slip stripes, the ramp enhances friction and traction, effectively handling wet and rainy conditions and minimizing the risk of wheel slippage.

The ramp's width of 90cm allows for customizable cutting to accommodate various threshold widths in different venues. The remaining part can also serve as a doorstop, protecting thresholds from damage. Its gentle angle facilitates easy climbing for sweeping robots.

Ensuring a secure fit to the ground, the solid threshold ramp comes with double-sided adhesive for firm fixation on floors or smooth tiles. It resists shifting when placed in garages, doorways, roadsides, supermarkets, and other locations, providing stability and safety.

### Specifications:

- Can take weight up to 15,000kg
- Dimensions: 90 x 4cm
- Weight: 6.2kg
- Material: Rubber
