

2m Handrail Stair Rail Grab Balustrade Staircase Banister + Installation Kit

Out of Stock: \$79.95

Our handrail for stairs is crafted from wrought iron and galvanized tube, featuring a corrosion-resistant coated surface and a double-layer protection design for extended durability. Not only does it exude sturdiness, but it also adds a unique flair to the staircase. The handrails boast smooth and stable corners, ensuring solidity while safeguarding against scratches, providing an extra layer of security for those who may feel unsteady on ladders. Plus, its metal construction allows for easy cleaning.

Whether serving as a horizontal, inclined, or vertical balustrade, wrought iron handrails seamlessly integrate into various settings. Installing them onto the house wall is a breeze, requiring just a few quick measurements, drilling, plugging four holes, and securely fastening them onto the wall. Each part of the handrail features a threaded interface, facilitating effortless assembly without the need for additional tools. This makes the steps much safer to use, especially for elderly individuals.

The versatility of this tube extends beyond stair handrails, finding applications as clothes racks, villa fences, kitchen foot rails, bathroom handrails, and door handles in apartments and office buildings. It's also ideal for wall decoration and as a fixed pole for plants.

Specifications:

- Material: wrought iron and galvanized tube
- Size: 2 x 100cm Handrail (Measuring between the 2 round plates)
- Color: Black
- Pipe Diameter: 3.2cm
- Flange Diameter: 8.5cm
- Distance from the wall to the handrail: 7cm

Attributes:

- Size: 2m
